**Wednesday, June 12, 14:00 - 16:00**

**EAPS Working Group Infertility and Medically Assisted Reproduction**

**G.02 Workshop organized by the EAPS Working Group Infertility and Medically Assisted Reproduction. The purpose is to network, update**

**each other on our research (plans) and engage in discussions about the challenges and opportunities of doing research/teaching on infertility and medically assisted reproduction. During the meeting PhD students and early career researchers (especially if they have not been invited to an oral session at EPC) will have the opportunity to present and receive feedback on their work in progress in an informal and constructive environment. In addition, Tom Emery will give a presentation on the ODISSEI data infrastructure regarding topics related to reproduction, including infertility and assisted reproduction. For information: <https://www.eaps.nl/page/infertility-medically-assisted-reproduction>.**

**Wednesday, June 12, 14:00 - 16:00**

**EAPS Working Group Sustainable Ageing**

**G.05 This is the first event of the EAPS Working Group Sustainable Ageing. The event will begin with an introduction to the group and its aims, followed by short input-talks on inter-generational relationships and climate change, technological change across age and cohorts, and on making sense of science for policy. The event will conclude with a group discussion and a brainstorming on collaborations for the study of sustainable ageing. All EAPS members as well as scholars from other**

disciplines who work on sustainable ageing may join the Working Group and participate in its events, that are coordinated by a Steering Committee: Valeria Bordone, Bruno Arpino, and Pearl Dykstra.

Registration for this event is on a first-come-first-served basis. A confirmation of your registration will be sent when registration closes. The steering committee maintains a mailing list, through which all members of the group will be informed about future events. For information:

<https://www.eaps.nl/page/sustainable-ageing>.

Wednesday, June 12, 14:00 - 16:00

**EAPS Working Group Child and Adolescent Development**

**LG.06** The Working Group organizes a masterclass on “Families and Child Development and Well-being” for early-career scholars. The Masterclass will be opened by a keynote presentation of Afshin Zilanawala (University of Southampton), followed by up to 6 selected early career scholars, who will have the chance to present their work and receive feedback from the members of the Working Group. The meeting will end with an informal networking time with refreshments. PhD students or researchers who have received their PhD no more than 7 years ago are eligible (although individual cases can be

evaluated in relation to, for example, career breaks such as maternity leave).

Wednesday, June 12, 14:00 - 16:00

**Generations and Gender Programme GGP**

**LG.08**

Wednesday, June 12, 14:00 - 16:00

**EAPS Working Group Equity and Diversity in Demography and Demographic Research**

**LG.09** This is the first meeting of the Working Group. This will be an opportunity to meet face-to-face, to share thoughts and ideas regarding how we can meet our objectives, and to promote future activities (including participation). After the first meeting, we will begin a suite of activities. The exact form of these will be organic, and develop over time, which is why we are keen for as many people as possible to get involved in the group and play a part in setting our agenda. Please get in touch and help us to improve the health of our discipline. More information: <https://www.eaps.nl/page/equity-and-diversity-in-demography-and-demographic-research>

Wednesday, June 12, 15:30 - 17:00

### Population Europe Event

G.03 (Lecture Theatre)

Wednesday, June 12, 17:30 - 18:30

### Opening Ceremony and Keynote Address

McEwan Hall The EPC 2024 Keynote Address will be given by Emily Grundy, professor of Population Science, University of Essex on "Family life courses and intergenerational influences on health and well-being in ageing populations". "Family and social connections and relationships are identified as one of the most important domains influencing quality of life. Accumulated stresses and supports across the life course, as well as current circumstances, are also known to influence later-life health. Effects of these influences may interact with socio-economic sources of advantage and disadvantage and vary by context. Life course events in one generation may also affect the well-being of other generations. In this presentation I will consider some of the factors influencing the availability of close family for older people in Europe, examine differentials in health associated partnership and fertility histories and

other life course events and intergenerational influences on health and demographic behaviour. Finally I will consider the implications of these associations both for the sustainability of support systems, particularly for older people, and for environmental sustainability".
