

EUROPEAN DOCTORAL SCHOOL OF DEMOGRAPHY

ABOUT

The EDSD is an eleven-month sponsored program that is offered every year aiming to provide students with an appropriate high-level education in demography to pursue their doctoral studies. Students will acquire a solid knowledge base on the causes and consequences of demographic change, population data, statistical and mathematical demography, as well as modelling, simulation, and forecasting. Many of the School's courses concentrate on strengthening the quantitative and programming skills of the students. The language of the School is English.

In the 2022/23 academic year, the School will be held at two different locations. The preparatory courses (from early September to late October 2022) will be offered at the Max Planck Institute for Demographic Research (<https://www.demogr.mpg.de/en>) in Rostock, Germany. The core courses (from November 2022 until end of July 2023) will be held at the Centre for Demographic Studies (<https://www.ced.cat/en/>) at the Universitat Autònoma de Barcelona, Spain.

The EDSD does not charge fees. Several European research institutes and universities provide full fellowships for all students accepted to the program.

The EDSD is not an online programme, and students are expected to participate in person. However, due to the current uncertainty about the course of the COVID-19 pandemic, we are prepared to make all the necessary arrangements to hold the School online when health conditions demand for it. At this time, we cannot predict whether the program will start online, on-site, or a combination of both. A decision will be made by the end of May, and we will communicate it on our website (<https://www.eaps.nl/edsd>).

Master's Degree in Demography

Successful completion of the School results in a European Research Certificate of Demography provided under the auspices of the European Association for Population Studies (EAPS).

Upon successful completion of the program and presentation of a thesis, the students enrolled in the EDSD will receive an official European Master in Demography delivered by the Universitat Autònoma de Barcelona.

COURSES

Preparatory courses in Rostock

The courses in Rostock consist of (1) Measures and Models in Demography, (2) Basic Mathematics for Demographers, (3) Basic Statistics for Demographers and (4) Computer Programming for Demographers.

The aim of the preparatory courses is to prepare the students for the core courses at CED in Barcelona.

Core courses in Barcelona

The program at CED consists of seven courses on (1) Population Data and Science, (2) Demographic Theories: causes and consequences, (3) Statistical Demography, (4) Current Population Issues, (5) Mathematical Demography and (6)

Demographic Modelling, Simulation and Forecasting, (7) Thesis courses. In addition, computer, graphic, presentation and writing skills are taught. Students devote 20% of their time to thesis research.

Student will be also offered the opportunity to attend CED's Social statistics and Population Seminars held weekly.

HOW TO APPLY

To be eligible for admission to the program, a student should hold a Master's degree in demography, mathematics, statistics, public health, economics, sociology, geography, biology, computer science, history or another relevant field. Students enrolled in a Master's degree can apply, but they are expected to have completed it and be in possession of the official title before the beginning of the EDSD program (in case of being accepted). At the time of application, students may, or may not be enrolled in a PhD program. Students participating in the EDSD without being enrolled in a PhD program are expected to enrol for such a program while doing the EDSD or immediately after.

Participants must have a curious mind and a deep interest in demography and population development either of humans or of species across the tree of life, and a demonstrable competence in English. EU citizens must have a valid [European Health Insurance Card](#) (EHIC) for the duration of the program. In case of being selected as a successful candidate, non-EU citizens will have to apply for student visa in the Spanish embassy in their country of origin.

Application deadline is April 22, 2022 for a September 5, 2022 start date. Successful candidates will be announced in late May 2022.

To apply e-mail the following documents to edsd@ced.uab.es:

- CV detailing educational and work history, language abilities, plus any scholarly publications.
- One recent letter of recommendation.
- Motivational letter (up to 5 double-spaced pages) introducing yourself and presenting your professional interests, background (beyond what is obvious from your CV) and plans. Explain how you expect EDSD could promote your future career. Include a detailed description of your quantitative skills (mathematics, statistics, and computer programming).
- Official transcripts and degree certificates of your Bachelor's and Master's degrees in English or English translation.
- TOEFL (internet-based: 100, computer-based: 250, paper-based 600) or CAE test scores. Alternatively, a degree taught in English or a declaration of why you are proficient in English.
